Re: Cancellation of State Lease #ML 18847, Pumice Pit, S/001/029, Beaver County, Utah

Dear Mr. Jennings:

On February 26, 1998, the School and Institutional Trust Lands Administration (SITLA) notified us that they had canceled your state lease #ML 18847, for non-payment of the annual rental/minimum royalty. SITLA also notified you that reclamation was required and listed the measures that had to be taken prior to May 1, 1998.

The small mining permit you have with this office, S/001/029, is not valid unless you have clearance from the land owner to mine. Please contact me at (801) 538-5321 to inform me what your intentions are; i.e. are you going to re-instate your lease or reclaim the project area? If you are going to reclaim, please contact me so that we can be present when you are ready to reseed the project. A seed mix can be prepared by our biologist if you so desire. The best time to seed is late fall, or early spring. As you have been given a deadline of May 1st to complete the reclamation, the earlier this can be accomplished the better for the seed to germinate.

Thank you for your prompt attention to this matter. I await your immediate reply.

Sincerely,

Tom Munson
Senior Reclamation Specialist
